Exporting from Scopus into RefWorks

Conduct your search for articles.

From the results list, mark the records you want to keep by clicking in the check-box to the left of that item. Then click on Export, which is just above the results list.

A pop-up box will appear: Select RefWorks then choose which Customize export option you want, e.g. Citation information. Then click on Export.
A new window will open. Choose the version of RefWorks you are using to export your references to.

Your references will automatically be imported into your RefWorks account.

Click on View Last Imported Folder to see them.
