

Exporting from Proquest Databases into RefWorks

Conduct your search:

The screenshot shows a search bar with the text "social isolation elderly" circled in orange. Below the search bar are options for "Peer reviewed", "Modify search", "Recent searches", and "Save search/alert". A "Related searches" section lists "Older people", "Older people AND Social Support", and "Older people AND Aging". The results section shows "226 Results" with options for "Cite", "Email", "Print", and "Save". A "Sort" dropdown menu is set to "Relevance". Two results are visible, each with a checkbox and a graduation cap icon. The first result is "Social Isolation and Cognitive Function in Appalachian Older Adults" by DiNapoli, Elizabeth A; Wu, Bei; Scogin, Forrest. The second result is "Upstream thinking and health promotion planning for older adults at risk of social isolation" by Wilson, Donna M; Harris, Ashley; Hollis, Vivien; Mohankumar, Deepthi.

Select the articles you want to export by clicking in the check-box to the left of the item.

Then click on the **Save** link, then on **RefWorks**.

This screenshot is similar to the first one but shows the "Save" dropdown menu open. The menu options are: "My Research", "Export/Save", "RefWorks", "EasyBib", "HTML", "PDF", "RIS (works with EndNote, Citavi, etc.)", "RTF (works with Microsoft Word)", "Text only", and "XLS (works with Microsoft Excel)". The "RefWorks" option is circled in orange.

From this Export/Save box click on **Continue**.

Choose the version of RefWorks you are using to export your references to:

RefWorks

Export to legacy
RefWorks

If you recognize the round orange RefWorks logo and have a legacy RefWorks account, select this version to export to. Legacy RefWorks is the version of RefWorks available at most institutions.

OR

ProQuest®
RefWorks

Export to the new
RefWorks

If you recognize the square blue RefWorks logo and have a new RefWorks account, select this version to export to. The new RefWorks is not yet available at all institutions and yours may not support it.

If you do not have RefWorks already open and logged into, RefWorks will now automatically open and you can log in.

The references will be automatically imported into your RefWorks account.

Click on **View Last Imported Folder** to see them.

Word of caution:

When you export records, RefWorks will open up in a new window each time.

If you already have RefWorks open that will also remain open – i.e. you will have two windows open displaying your RefWorks account. One of these will be the previous version without the items you have just attempted to export.

You will need to close this window down to keep track of your references.
