▶ View Abstract

2.  The relationship between diabetic retinopathy and diabetic nephropathy in a population-based study in Korea (KNHANES V-2, 3).  
Lee W.J., Sobrin L., Lee M.J., Kang M.H., Seong M., Cho H.  
Investigative Ophthalmology and Visual Science. 55 (10) (pp 6547-6553), 2014. Date of Publication: 2014.

1. Select the records you want to export by clicking in the check-box by that item.

2. Then click on Export

Export Citation(s)

Selected: 2-4  
Total: 3

Format:

Fields:

Include:  
 Link to External Resolver  
 URL

3. Select RefWorks from the Export Format section

4. Decide on how much information from the record you need to export, i.e. Complete Reference for everything.

5. Then click on Export

Choose the version of RefWorks (Legacy or New) that you want to export your references to.

## Continue exporting to RefWorks ?

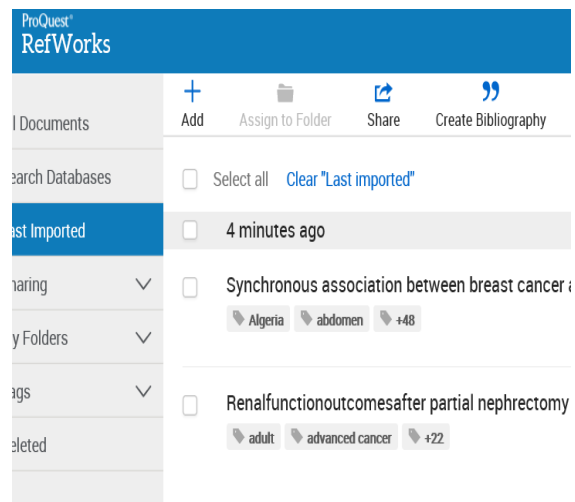

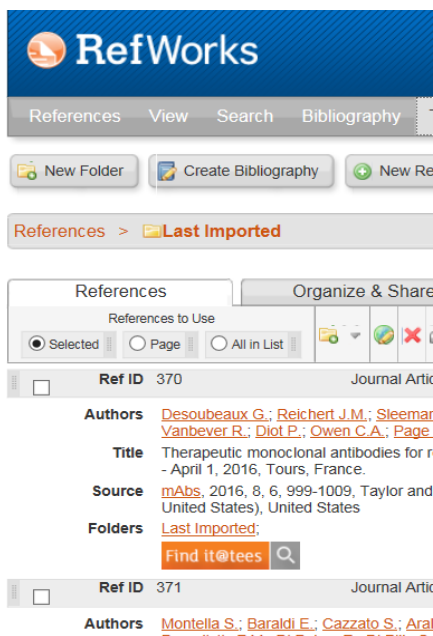

Yes, export to the newest version of RefWorks

If you have not previously logged into RefWorks you will need to do this now to access your account.

No, export to the legacy version of RefWorks

The reference will be automatically imported into your RefWorks account. Click on **View Last Imported Folder** to see them.

### Word of caution:

Please check the record, some editing may be necessary.

When you export records, RefWorks will open up in a new browser window each time.

If you already have RefWorks open that will also remain open – i.e. you will have two windows open displaying your RefWorks account. One of these will be the previous version without the items you have just attempted to export.

You will need to close this window down to keep track of your references
