Learning and Teaching Framework

Teesside University

FUTURE FACING LEARNING THEMES FOR CURRICULUM DEVELOPMENT	FUTURE READY	AI-FUELLED & DIGITALLY EMPOWERED	RESEARCH ACTIVE	GLOBALLY CONNECTED & SOCIALLY & ETHICALLY ENGAGED
	Objective 1 High quality, future ready graduates are developed through our commitment to industry relevance and entrepreneurship.	**Objective 2** Our students are digitally empowered with the latest skills and tools to deliver global impact.	**Objective 3** Our students encounter the grand challenges of our time through research and professional practice.	**Objective 4** Our students are globally connected and engage meaningfully with social and ethical issues from local, national and international perspectives.
ACADEMIC SKILLS	Our courses reflect the latest knowledge, skills and practices of disciplines, fields of study and/ or areas of practice.	Our courses are powered by and offer insight into critical, reflective and collaborative digital practices.	Our modern curricula develop students' research literacies and skills.	Our courses explore and challenge established knowledge, skills and practices, using a range of critical lenses from local, national and global perspectives.
LIFE SKILLS	Our courses develop students' life-skills – including those of collaboration, networking and leadership – to help them realise their work and life ambitions.	Our courses empower our students to become confident digital citizens, ready to embrace a range of digital futures.	Our courses provide students with the confidence to gather and use evidence in all aspects of their lives.	Our courses make space for conversations which celebrate difference and partnerships which enable global connections and diverse networks to flourish.
WORK SKILLS	Work-related learning opportunities, industry insights and work-based experiences are embedded within each of our courses.	Our courses create work-ready graduates with professional, industry-focused digital skills and credentials.	Our courses develop critical, research-active graduates able to gather and use evidence to power workplace innovations and change.	Our courses empower students to consider the potential for and actions needed to create and engage in global-sustainability and prosperity.
